OPEN TO      Lead Product Designer · Senior Product Designer · Senior UI/UX Designer

**SUMMARY**      HFI Certified Usability Analyst (CUA) with **11 years** of experience in software, UX, and product design, targeting senior-level opportunities across Product Design & UX Strategy, UX Research & Human-Centered Design, and Design Systems & UI/Interaction Design within IT Services & Software Product Engineering in Bengaluru or remote.

**HIGHLIGHTS**      Accumulated software design experience, across UX and product design, with expertise spanning SaaS, B2B, platform, enterprise, web, and mobile products.

Currently working as Lead UI/UX Designer, owning design initiatives from discovery and problem definition through research, information architecture, user flows, wireframes, high-fidelity UI, prototyping, and engineering handoff.

Accelerated generative-AI-assisted prototyping from **5 days to 4 hours**, exhibiting the capability to streamline design iteration and delivery through emerging technologies.

Enhanced user experience through a healthcare application redesign, driving improved user satisfaction while applying usability testing and competitive analysis to strengthen design outcomes.

Leveraged Figma, Adobe Creative Suite, accessibility standards, design systems, scalable frameworks, usability testing, and competitive analysis to create cohesive and inclusive digital experiences.

Exhibited end-to-end product design ownership with strategic acumen, data-driven and evidence-based decision-making, AI-assisted and conversational product experience design, alongside leadership and design mentorship.

**SKILLS**      **Product and UX design.** Product strategy, product vision and design vision, UX strategy and design strategy, human-centered and user-centered design, design thinking, systems thinking, discovery, problem framing and problem definition, information architecture, user flows, journey mapping, wireframing, prototyping, interaction design and end-to-end ownership.

**Research.** UX research and user research, user interviews, personas, usability testing, concept testing, competitive analysis, hypothesis-driven design, qualitative and quantitative synthesis, product analytics, data-informed decisions.

**UI and design systems.** UI design and visual design, typography, layout, high-fidelity mockups, responsive web and mobile, scalable design systems, component libraries, reusable patterns and design patterns, design tokens, style guides, accessibility and WCAG.

**Tools and delivery.** Figma (components, variants, auto layout, Dev Mode), FigJam, Adobe Creative Suite. React (component architecture, props, state). Design documentation, developer handoff, annotated specs, Agile and Scrum, Jira, Confluence.

**AI-assisted design.** AI-powered and generative AI tools with Claude, ChatGPT and Gemini for ideation and interactive prototypes; AI-driven and conversational product experiences.

**Leadership.** Design leadership, mentorship, hiring, career guidance, design critique and design review, design quality standards and attention to detail, facilitating workshops, stakeholder management, client management and consulting, design storytelling and innovation, cross-functional collaboration with product management, engineering and user researchers.

WORK

- GeekyAnts** Apr 2017 – Present
- Lead UI/UX Designer
- Lead UI/UX Designer, Jul 2022 – Present   Senior UI/UX Designer, Jul 2020 – Jul 2022   UI/UX Designer, Apr 2017 – Jul 2020
- Cut AI-assisted prototyping time from **5 days** to **4 hours** by building generative AI into the design workflow, then auditing the output to design-system and accessibility standards.
  - Delivered **15+** projects, from MVPs to enterprise engagements, for clients ranging from startups to large organisations.
  - Led a healthcare application redesign grounded in usability testing and competitive analysis.
  - Lead design for data-heavy, role-based and permission-heavy workflows across healthcare, fintech, recruitment, workplace safety and sports, so connected products read as one coherent ecosystem.
  - Turn ambiguous requirements into defined problems through journey maps, user flows and wireframes, then high-fidelity UI and interactive prototypes.
  - Run user interviews, usability studies and feedback sessions, and use the evidence to validate concepts and guide product decisions.
  - Build Figma component libraries and design tokens with annotated specs covering interaction states, edge cases and error handling.
  - Work with product managers and engineers in agile sprints, reviewing implementation and closing design-to-development gaps so what ships matches the design intent.
  - Manage **7 direct reports** within teams of **4-5 designers**, running critique, design review, planning, estimation and resource allocation across **15+** projects.
  - Mentored **30+** designers and contributed to **20+** hires, and represent design in pre-sales and senior client engagements.

**Phoenix LifeCare Systems** Jan 2016 – Mar 2017

UI/UX Designer

- Gathered requirements directly from clinical users and designed healthcare software for labs, clinics, hospitals and medical professionals.
- Designed responsive interfaces, prototypes and interaction flows with cross-functional teams to meet usability and delivery needs.

**WebTechiez** Mar 2015 – Jan 2016

Graphic and Web Designer

- Designed websites, landing pages, branding and digital assets with responsive layouts, and prepared developer-ready handoff to project timelines.

CREDENTIALS

**HFI Certified Usability Analyst (CUA)**   **IBM Enterprise Design Thinking Practitioner**  
**Adobe Certified Associate:** Photoshop, Illustrator, InDesign

EDUCATION

**Arena Animation** 2011 – 2014  
Diploma in Multimedia: Animation, Interactive Technology and Visual Design

LANGUAGES

English, Kannada
